

Message from Arunabha Ghosh

Dear Friends,

Warm season's greetings from CEEW! At the Council on Energy, Environment and Water, chaired by [Mr. Suresh Prabhu](#) and co-chaired by [Mr. Jamshyd Godrej](#), we are celebrating the close of a busy year. In the past 12 months we have produced a [National Water Resources Framework Study](#) for the Planning Commission of India for the 12th Five Year Plan and followed it up with [Roadmaps for Reforms](#) in the water sector. Last week, we submitted our report on global governance, [Understanding Complexity, Anticipating Change](#), to the National Security Adviser. We researched the linkages between energy, climate change and international trade, producing papers and policy briefs. We worked on the governance of geoengineering with institutions in Canada, China, the UK and the US and hosted a national workshop in Delhi. We facilitated the India-U.S. Clean Energy R&D Centre, bringing hundreds of partner entities together. And we began advising state governments on developing integrated plans for energy, environment and water. As we look to the future, we thank our partners and our donors. And we welcome you to join us in our quest (you'll find lots more information in this newsletter). We wish you every success in the New Year!

Warm Regards,
Arunabha Ghosh
